

DURUS FOLLOW FOCUS

Accurate. Versatile. Strong. Cinevate's Durus Follow Focus has been designed to give film-makers complete freedom. It can be used at any height, angle, or side the shot requires. With a 1:1 gear ratio, you can pull focus with total accuracy. CNC machined body and parts keep it light and tight, and its modular design and additional parts let you use it with any camera and lens combination.

Features:

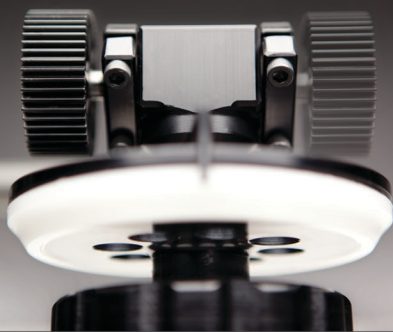

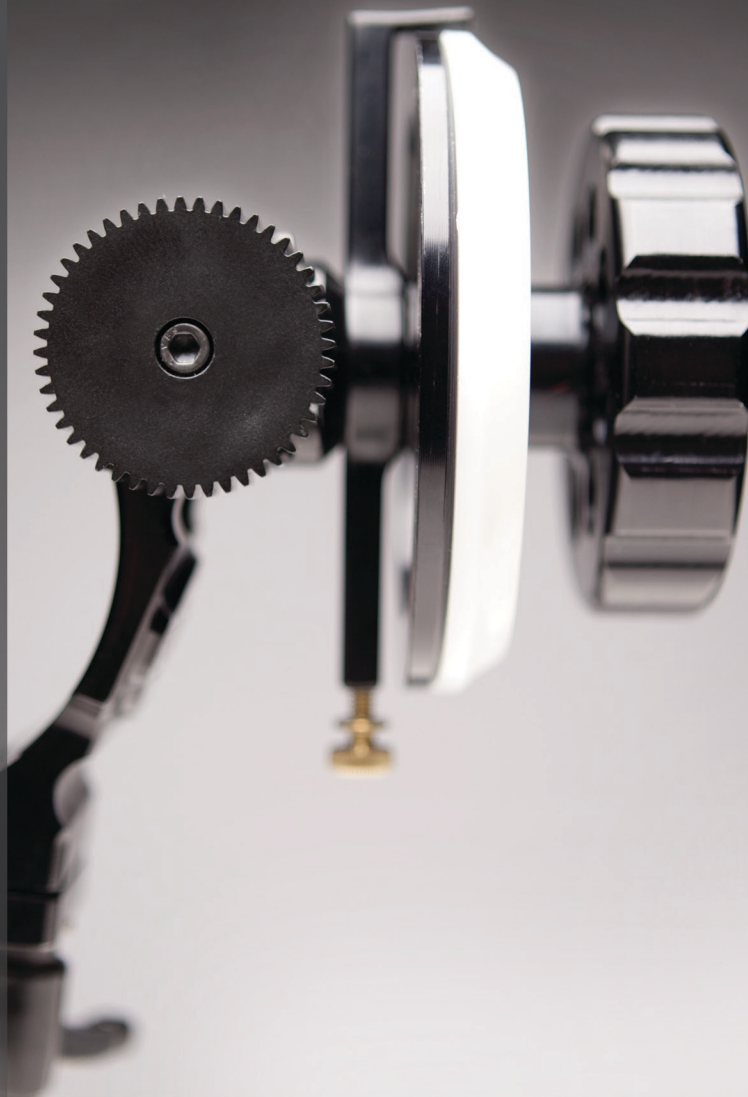

- CNC machined billet aluminum and steel mount, transmission, gear case, and focus knob
- Custom conical bearings
- Magnetically indexed, dry-erase focus ring
- 360°, unimpeded focusing
- Reversible, tiltable mount

Includes:

- 15mm rod mount
- Three 0.8 pitch gears
- Dry-erase focus ring

Available:

- 19mm rod mount
- 0.5 pitch gears
- Oversized gear for large cameras

The specs read like those of an F1 car: CNC machined 0.8 pitch gears on conical bearings. Reversible, single-clamp, aluminum mount. Modular design. With features like this, you can rack with confidence and pull with grace. You can handle the tightest corners with ease - even upside down. In fact, the Durus Follow Focus is so strong, accurate, and versatile, the least we could do is give it a lifetime warranty, which is a lot more than an F1 car gets.

Show the World.
