Light. Adaptable. Silent.
The Pegasus Carbon LTS glides across any solid surface, like on our lightweight 15mm carbon fiber rails, or on table tops and floors. Rig it upside-down on the rails, or on a wire system with our optional cable wheels. A feather-weight at 5lbs, it is designed for loads up to 15lbs. It is height and tilt adjustable on a tool-free mount that can be set up or broken down in a matter of seconds.

Features:
- CNC machined billet aluminum
- 100% steel ball bearings and rubber tires
- Two rails blocks mount to tripods, c-stands, or light stands for height adjustability

Includes:
- 8 rubber tires
- 2 100cm (39") carbon fiber rails
- 2 versatile end blocks with table legs
- Standard camera baseplate

Available:
- 100mm bowl
- Articulating links
- Cable wheels

How you use the Pegasus Carbon LTS is entirely up to you. It is silent and smooth for straight-up tracking. If you need a table dolly, simply remove the Pegasus from the rails and let it glide. Need high-angle tracking? Just swap out the tires for the cable wheels and let it ride. Then break it all down in seconds and take it wherever you need to go.

Whatever your scene requires, whatever your imagination demands, the Pegasus LTS gives you options. **Show the World.**
